

# YEAR 5 LEARNING LETTER 12/10/23

We have continued learning about different types of words, this week, relative pronouns. The rest of our time has been trying to finish and publish our King Kong newspaper reports. We have been wrestling with the difference between reporting a story and writing a story.

Last week, we ran out of time to add the motors to our vehicles. So, this week we added the motors and planned what the shell of the vehicle will look like.

We finished our unit on forces by completing a poster about simple machines.

This week we have focused on the formal written methods of addition and subtraction. We have applied them to multi-step problems. We have also continued solving problems. We tackled a painted cube problem this week.

RE

We explored how someone performing a web search can influence the results that are returned, and how content creators can optimise their sites for searching. We also explored some of the limitations of searching.

Trevor, from St Paul's Church visited this week to tell us how the church promotes and is involved in environmental 'stewardship'.

Looking Forward

Ambassadors

Ethan – who took his science learning home and explored pulleys even more

Next week,

We will be finishing our unit on Addition and Subtraction and starting Multiplication and Division. We will also be starting a new book in English- 'Unspoken'. We will consider 'identity' on the internet and social media and hopefully be finishing our electric vehicles.
