

YEAR 5 LEARNING LETTER 19/10/23

We have started our new book – 'UNSPOKEN' which has no words. We have learned about synonyms and antonyms, made predictions using modal verbs, researched the American Civil War and the Underground Railroad and planned a piece of first-person writing.

We finally finished our electric vehicles by designing a body to cover the motor. With a few last minute tweaks we flicked the switch and tested them.

We were also lucky to have Mrs Straker come and do some cooking with us.

We had a real investigative history session. We found out about British Roman towns, drew them and mapped them using Digimaps as well as researching their Roman names. We also found out about Roman roads- how they built them, why they built them and where they built them.

We have moved onto multiplication and division. The focus has been on some new terms and vocabulary – multiple, factor, common multiple and common factor. We are realizing the importance of knowing our times tables.

Ambassadors

Amy D and Molly
Who have both worked really hard this term to understand and apply their learning

English

This Week

Computing

Maths

RE

This week we refreshed our ideas about content and making internet searches. We discussed how different groups can influence the results of a search.

Following the visit from Trevor last week we designed posters to persuade and encourage others to take care of the natural world.

Looking Forward

Next week,
I hope everyone has a refreshing break and comes back for that all exciting run up to Christmas
