## This week in Beech Class...

### Maths

In our fractions learning this week we have started to look at where fractions of a whole number will fall on a number line, comparing different fractions and equivalent fractions. Some of the children are starting to make links between multiplication tables and equivalent fractions. They are starting to see that learning their times tables will help them in all areas of maths.

### English

This week we have started to learn about writing instructions. We have looked at the features of instructions and how they are usually written to a specific formula. We have learnt about the language features of instructions and identified how bossy verbs and time connectives can help the reader to follow instructions exactly. The children imagined they were witches and wizards and had a go at writing instructions for their own magic spell.

### History

Mrs Pirie taught the children history on Thursday afternoon and they learnt about why the Stone Age came to an end. They looked at how man was first able to manufacture metals and how life changing this new innovation was. The children were shown some Bronze Age artefacts and made suggestions as to what they thought they were.

## STAR OF THE WEEK

**Myla -**  
**for becoming a half millionaire on our**  
**Accelerated Reader programme.**
