

## YR5 LEARNING LETTER 3/5/24

This week, we have learned about how to construct the future perfect tense. We have also solved the case of Bigfoot and presented a reasoned argument. We have written a chronological report of UFO sightings and a diary entry. These have focused on the features of these types of writing.

Mrs Gailor asked us to give ourselves a super power and asked us how this would help us to be brave and more resilient. We also thought about our own responsibilities and how they can make us feel.

Mapping was the key learning this week. We identified an area of Britain with National Parks and looked at the human and physical features of the area.

Geography

English

PSHE

Combining shapes to create an image was our focus with Vector Graphics. We used some new tools and learned about the importance of order and layering.

Having learned about different angles we have now been calculating angles – using our knowledge to help find missing angles. We also have reminded ourselves about regular and irregular polygons.

Maths

This Week

Computing

SCIENCE

We explored the lives and work of some of the scientists who helped us understand our solar system. While considering the heliocentric theory we focused on Galileo Galilei and Nicolaus Copernicus.

Looking Forward

Ambassadors

Sienna and Levi

Both have shown a good understanding of angles and calculating missing angles.

Next Week

We will continue our investigation of mysteries, looking at sea monsters and crop circles. We will finish our unit about angle and shape and continue learning about the art of David Hockney.
