

YEAR 5 LEARNING LETTER 11/10/24

We have been reporters this week. We have learned about the structure of a newspaper report and then written about the King Kong story. We tried to answer the main questions, give an outline of the events, include quotes (as well as using indirect speech) and include an opinion about the story.

We used carbon paper to print our 'word portrait' onto the collage background we prepared last week.

We found out about simple machines and how they make 'work' easier. How they can turn a small force into a big force.

This week, we investigated how internet searches can be influenced. We looked at 'the searcher', 'the search engine' and the 'website creator'. We discovered that we have to refine our searches, possibly use different search engines and be aware of how websites are created.

We came to the end of our short unit on addition and subtraction. We solved multi-step problems. We compared calculations by looking at the numbers involved and we found missing numbers by using out knowledge.

We tackled a tricky problem. Can a Christian accept the theory of the big bang and the theory of evolution? We had a great debate and produced some art to try and represent the big bang and evolution theories.

Looking Forward

RE

NEXT WEEK

FOREST SCHOOL – NEXT FRIDAY

We will start a new book study in English – UNSPOKEN. We will also start a new maths unit – multiplication and division. Hopefully that times table practice will pay off. We will also be catching up with RE, History and Art.
