

YEAR 5 LEARNING LETTER 29/11/24

We were introduced to 'THE LOST THING'. We made our own lost thing and wrote a descriptive tag for it. We wrote a journal for the boy in the story focusing on using subordinate clauses. We then wrote a very formal letter using the subjunctive mood.

There had been an accident at the supermarket and everything had become mixed up. We had to separate the mixture using different techniques and knowledge about the properties of materials.

We focused on the processes of erosion and deposition in rivers and some of the features associated with these processes. We learned about meanders and waterfalls. We also identified the features on maps.

We started the week comparing and ordering fractions. This has involved application of rules concerning the numerators and denominators. Later, we were adding fractions.

This week we thought about the order of the making process and completed a flow diagram. We also thought about our design and began to plan our body.

Logan for;
excellent attention to detail when making choices about spending money
Avah for;
Making good ethical choices about the value of money

This week we considered the value of money and making considered, ethical spending choices

NEXT WEEK
We will continue to add fractions and subtract. We will be adding parenthesis to our writing. We will be using a storyboard to plan our own videos. We will be learning about thermal conductivity. This will be our last 'normal' week before Christmas kicks in.
