

YEAR 3 WEEKLY LEARNING

Autumn Term

Science

The children continued their learning about forces and magnets by building on their earlier exploration of push and pull forces. After discovering how objects can move in different ways, they were introduced to magnets and how they can attract or repel without even touching. The class especially enjoyed investigating which materials were magnetic, testing a range of objects and making predictions about what might happen. Their curiosity grew as they compared their findings and noticed patterns, helping them deepen their understanding of how magnets work in the world around them.

Important Messages

Friendly Request

Please ensure that children regularly practice their times tables on TTRS (Times Tables Rock Stars). Additionally, please continue reading with your children daily, as this greatly enhances their comprehension skills.

Achievements

This week achievement certificate has been awarded to:

- **Rosie B.** for her improved handwriting, showing she can form all her letters correctly.
- **Dhiyaani** for her letter formation in her everyday writing, showing growing confidence and care in her work

Congratulations on your exceptional dedication and hard work!
