

YEAR 3 WEEKLY LEARNING

Autumn Term

Science

This week, the children continued their learning about light. After learning that light is reflected from surfaces, they investigated a range of materials to determine whether they were transparent, opaque, or translucent. Next, the children went outside to investigate their own shadows.

Important Messages

You have all worked incredibly hard this term, and you should be very proud of everything you have achieved. As the Easter holidays begin, I hope you take this time to rest, relax, and enjoy special moments with your family and friends. May your break be filled with happiness, laughter, and lots of joyful adventures. You truly deserve it! Have a wonderful, peaceful, and joyful Easter break, and I look forward to seeing your bright smiles when we return. Happy Easter! 🐣🌷🌸

Friendly request

Please continue to read regularly with your child and talk about the stories together, as this helps to build their understanding and enjoyment of reading.

It would also be very helpful if you could continue supporting your child with their times tables and practicing number bonds to 10, 20 and 100. Regular short practice at home really helps children to become more confident and fluent with their Maths.

Thank you again for your ongoing support.

Achievements

This week's achievement certificate has been awarded to Dhiyaani for always following instructions carefully, working hard to complete her activities, and putting great effort into all of her learning.

Your determination and positive attitude make you a wonderful learner. Keep up the fantastic work!
