

YEAR 3 WEEKLY LEARNING

This week

Maths

This week, the children started their new Maths topic on Addition and Subtraction. They have been building on their knowledge from Year 2 and developing their understanding of adding and subtracting 2-digit and 3-digit numbers, including exchanging. The children have been drawing on their essential number knowledge, particularly their understanding of number bonds to and within 10, to help them solve calculations efficiently and confidently. They have been working hard to explain their methods and apply their knowledge to a range of problems.

Geography

Across the two Geography lessons, the children continued to explore the economy of the Costa Blanca and compare it with our local area. They looked at different cities and towns across the Costa Blanca and discussed the types of jobs people do, where local people work and how businesses generate income. The children then compared this with the Addlestone area, thinking about the different jobs people in our community do and how these contribute to the local economy. They then focused on a business of their choice, researching and recording key information about it. To finish, the children used their research to create an eye-catching advertising poster for their chosen business.

Issue Number Four

Important Messages

A few important reminders: Please continue to read with your child every day to support their fluency, vocabulary and comprehension. We would also encourage children to practise their 2, 5, and 10 times tables regularly to build their confidence and accuracy. Homework will be sent home every Friday and should be completed and returned to school by Thursday. Thank you for your continued support!

Achievements

This week achievement certificate has been awarded to:

- **Amber** for her excellent research skills when learning about the Costa Blanca and for creating an informative and engaging poster advertising pony riding. Well done, Amber!
- **Florence** for excellent engagement in our Geography lessons and for creating an accurate and well-presented graph to show and compare temperatures in the Costa Blanca and London. Well done, Florence!

**Congratulations on your
exceptional dedication and hard
work!**
